WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2005/005797

Вох	x No. I	Basis of this opinion	
1.	With filed,	regard to the language, this opinio unless otherwise indicated under the	n has been established on the basis of the international application in the language in which it was its item.
		This opinion has been established	on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under
	-	Rule 12.3 and 23.1(b)).	
2.	With	regard to any nucleotide and/or ntion, this opinion has been establis	amino acid sequence disclosed in the international application and necessary to the claimed hed on the basis of:
	a.	type of material	
		a sequence listing	·
		table(s) related to the sequen	nce listing
	b.	format of material	
		in written format	
		in computer readable form	
	c.	time of filing/furnishing	·
		contained in the internation	al application as filed.
		filed together with the inter	national application in computer readable form.
			his Authority for the purposes of search.
1			
3.	. Ц	c :- L I sha a simud statement	te than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or is that the information in the subsequent or additional copies is identical to that in the application as
		filed or does not go beyond the a	pplication as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2005/005797

Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:						
u	ne entire international application					
	laims Nos.					
because:						
	he said international application, or the said claims Nos.					
. r	elate to the following subject matter which does not require an international preliminary examination (specify):					
	·					
	·					
	the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):					
	are so divided that no meaning is optioned.					
l						
· ·						
	•					
	the claims, or said claims Nos are so inadequately supported					
	by the description that no meaningful opinion could be formed.					
	no international search report has been established for said claims Nos. 22-25					
	the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:					
	the written form has not been furnished					
	does not comply with the standard					
	the computer readable form has not been furnished					
	the computer readable form has not been furnished does not comply with the standard					
	the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.					
	See Supplemental Box for further details.					

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2005/005797

Box	No. I	v	Lack of unity of invention							
1.		Inre	ponse to the invitation (Form PCT/ISA/206) to pay additional fees the applicant has:							
	_	M	paid additional fees							
•			paid additional fees under protest							
		H	not paid additional fees							
2.			Authority found that the requirement of unity of invention is not complied with and chose not to invite the applicant to pay ional fees.							
3.	This	Auth	ority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is							
		com	olied with							
	\boxtimes	not	omplied with for the following reasons:							
		point of "accumulating detection information from a detection means and alarm information generated when an abnormality in the detection information is detected as processing history in an information accumulation part, acquiring information related to alarms that were selected from the alarms that occurred from the information accumulation part and displaying the information related to the acquired alarms", but this point is described in prior art documents, for example, [US, 2003-00223340, A1 (Toru Kitamoto), 30 January, 2003], and others, so that it cannot be a special technical feature. And in view of the specific modes of the inventions described in the claims, the claims of this international application are considered to describe 11 inventions: [1, 2, 13 and 14], [3-5 and 15-17], [6 and 21], [7-9 and 18-20], [10], [11], [12], [22], [23], [24] and [25].								
			•							
		·								
	4. C	Conseq	æntly, this opinion has been established in respect of the following parts of the international application:							
] a	l parts .							
		∑ ₁	e parts relating to claims Nos. 1-21							

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/JP2005/005797

Box	No. V Reasoned stateme	ent under Ru lanations sup	tle 43bis.1(a)(i) with porting such state	n regard to novelty, inve	ntive step or industrial applicabili	ty;
1.	Statement					
	Novelty (N)	Claims			· · · · · · · · · · · · · · · · · · ·	YES
		Claims	1-21			—. №
	Inventive step (IS)	Claims		lai .		YES

Document 1: US, 2003-0023340, A1 (Toru Kitamoto), 30 January, 2003 (30.01.03), Full text, Figures 1-20

Claims 1-21

The inventions of claims 1-21 do not appear to be novel or to involve an inventive step in view of document 1 cited in the ISR.

Document 1 (Paragraphs [0077] - [0221] and Figures 1-20) describe outline information corresponding to each alarm, and also disclose the idea to store, in advance, an alarm table that is linkable to the processing history in the information accumulation part, let an alarm generation part generate an alarm when the detection means detected an abnormality, accumulate detection information detected by the detection means and alarm information generated by the alarm generation part when the detection means detected an abnormality as processing history of the processing device, acquire, from the information accumulated as processing history, sequential information leading to the generation of the alarms related to the selected alarms as link information, and display sequential information leading to the generation of the alarms including information selected from the alarm table and I/O information from the time before and after the alarm generation, and information including the measures to address the cause for the occurrence in a display means.
